Edward Bayne of Boeing Receives 2009 Edward J. Gluecker Award

Washington, DC - On Monday, July 13, Edward Bayne, Enterprise Interface at Boeing Commercial Airplanes was honored with the 2009 Edward J. Glueckler Award by the Aviation Suppliers Association (ASA) Board of Directors and membership at the organization's annual conference.

President of ASA, Michele Dickstein, said "Ed has shown great leadership both within ASA and the industry as a whole. He has always been eager to share his expertise with the membership and others. We're thrilled to honor him with this award and thank him for his involvement and service."

Each year, the Edward J. Glueckler Award is presented at ASA's Annual Conference in recognition of outstanding commitment, dedication, and contribution to the Association and the aviation industry. The award is named for the founder and first President of the Aviation Suppliers Association, who presented this year's award at the Omni Orlando Resort in Orlando, Florida.

"Recognition for what an individual has accomplished professionally is always welcome. When an individual is recognized by his peers for his accomplishments and contributions to the industry, it is truly a recognition of honor," said Edward J. Glueckler, founding President of ASA. "Ed Bayne of the Boeing Company is one of those modest individuals who has finally been recognized by his peers throughout the aviation community for his passionate support of the commercial aviation aftermarket."

About the Aviation Suppliers Association

The Aviation Suppliers Association (ASA) is a not-for-profit trade association, representing companies that buy and sell aircraft parts. ASA focuses on regulatory and legal matters that affect the aviation parts supply industry. Member companies include distributors, suppliers, surplus sales organizations, repair stations, manufacturers, air carriers and other companies that provide a service to the aviation parts supply industry. ASA proudly promotes safety, regulatory compliance and ethical business practices among aviation parts suppliers and throughout the aviation community.

About Boeing Commercial Airplanes

Boeing has been the premier manufacturer of commercial jetliners for more than 40 years. With the merger of Boeing and McDonnell Douglas in 1997, Boeing's leadership in commercial jets, joined with the lineage of Douglas airplanes, gives the combined company

a 70-year heritage of leadership in commercial aviation. Today, the main commercial products are the 737, 747, 767 and 777 families of airplanes and the Boeing Business Jet. New product development efforts are focused on the Boeing 787 Dreamliner, and the 747-8. The company has nearly 12,000 commercial jetliners in service worldwide, which is roughly 75 percent of the world fleet. Through Boeing Commercial Aviation Services, the company provides unsurpassed, around-the-clock technical support to help operators maintain their airplanes in peak operating condition. Commercial Aviation Services offers a full range of world-class engineering, modification, logistics and information services to its global customer base, which includes the world's passenger and cargo airlines, as well as maintenance, repair and overhaul facilities. Boeing also trains maintenance and flight crews in the 100-seat-and-above airliner market through Alteon, the world's largest and most comprehensive provider of airline training.
