9100 Correlation matrices
9100:2016 to 9100:2009
9100:2009 to 9100:2016

This document provides correlation matrices from 9100:2016 to 9100:2009 and 9100:2009 to 9100:2016.

This document can be used to highlight where the new, revised and deleted clauses are located, as well as the location of clauses that are unchanged.

Please note that Annex A in 9100:2016 states the following:

A.1 Structure and terminology

- *The clause structure (i.e. clause sequence) and some of the terminology of this edition of this International Standard, in comparison with the previous edition (9100:2009), have been changed to improve alignment with other management systems standards.*

- *There is no requirement in this International Standard for its structure and terminology to be applied to the documented information of an organization's quality management system.*

- *The structure of clauses is intended to provide a coherent presentation of requirements, rather than a model for documenting an organization's policies, objectives and processes. The structure and content of documented information related to a quality management system can often be more relevant to its users if it relates to both the processes operated by the organization and information maintained for other purposes.*

- *There is no requirement for the terms used by an organization to be replaced by the terms used in this International Standard to specify quality management system requirements. Organizations can choose to use terms which suit their operations (e.g. using "records", "documentation" or "protocols" rather than "documented information"; or "supplier", "partner" or "vendor" rather than "external provider"). Information on the major differences in terminology between this edition of this International Standard and the previous edition can be found in Table A.1 of 9100:2016.*
